EDUCATION

Boston University | Boston, MA

January 2027

Bachelor of Science in Media Science; Minor in Computer Science

RELEVANT EXPERIENCE

Ubiquitous

New York, NY

Product Analytics Intern

May 2026 - July 2026

- Built a dynamic analytics dashboard that tracks engagement, retention, and growth for over 7,000 users of a mobile platform, enabling real-time cohort analysis across different time windows
- Engineered an end-to-end data pipeline using Python, Google Drive API, and Google Sheets API that automatically ingests daily user snapshot files, computes the metrics, and serves results through a live Streamlit dashboard shared via URL
- Conducted competitive analysis of Mixpanel, Amplitude, and Firebase to benchmark retention visualization and inform dashboard architecture decisions

Boston University

Boston, MA

Research Assistant

October 2025 - February 2026

- Analyzed historical comic book market data using statistical analysis to identify trends in pricing and media influence to support a marketing research paper on industry evolution
- Produced weekly reports and data visualizations summarizing key findings enabling project collaborators to make data-driven decisions
- Conducted secondary market research by evaluating industry publications and historical market data to support evidence-based conclusions

MScience

New York, NY

Marketing Intern

June 2024

- Analyzed markets and consumer datasets to identify behavioral trends and make insights for client-facing marketing projects
- Assisted in organizing large datasets using Excel, identifying consumer behavior patterns and performance
- Collaborated with the research, engineering, and sales teams to understand how insights inform client strategies

PROJECTS

Ubiquitous Mobile Analytics Dashboard

- Designed and deployed a full-stack analytics system, engineering the data flow from raw daily exports to a live web dashboard accessible via shared URL
- Implemented a Google Sheets caching layer that stores pre-computed user-level metrics, reducing dashboard load time from minutes to under a second regardless of file volume
- Built a dynamic condition builder UI allowing stakeholders to filter active users, stickiness, and engagement metrics by user attributes (post count, friend count, invites, school affiliation) in real time
- Secured the pipeline using Google Cloud service accounts with scoped Google Drive permissions and Streamlit secrets management, keeping credentials off GitHub entirely

Research Paper on Beauty Standards

- Conducted interviews to collect quantitative and qualitative data from participants
- Analyzed findings to identify trends across age and gender demographics
- Co-authored a 12-page research paper on beauty standards within Gen Z integrating research findings and academic literature, concluding that social media significantly influenced beauty perception in our demographic

Research Paper on Competitiveness in Europe's top five leagues

- Conducted a research study analyzing competitive balance across Europe's top five soccer leagues using league standings, goal statistics, and UEFA Champions League results
- Collected and analyzed performance data to identify patterns in league parity and team dominance
- Created statistical comparisons and data visualizations to evaluate differences in point distribution, goal differentials and championship concentration across the leagues

CERTIFICATIONS

- Microsoft Certified: Power BI Data Analyst Associate | *In Progress - Expected September 2026*
- HubSpot Digital Marketing Certification

SKILLS AND INTERESTS

Technical: Google Workspace, Microsoft Office Suite, Python, Java, C, Streamlit, Excel, Google Apps Script, GitHub, Google Drive API, Google Sheets API, SPSS, Photoshop, Illustrator, InDesign, Animate

Languages: English (native), French (native), Spanish (intermediate), Arabic (intermediate)

Interests: Soccer, Basketball, Video game development, Evolutionary history, Jazz & instrumental music
